INDEX

Acceleration, horizontal angular
  vestibular nuclei unit response, 991, 1014
Acetylcholine
  quantum content in neuromuscular depression, 427
  release, response to paired stimuli, 427
Action potentials: *see* Cortical evoked potentials, End-plate potentials, Electric potentials
Acoustic stimuli: *see also* Sound
Acoustic stimuli
  additive and multiplicative responses in collicular neurons, 641
  mesencephalon unit response, bullfrog, 1132, 1155
Adenosine triphosphatase
  skeletal muscle content and fiber classification, 581
Afferent neurons, electroreceptive cutaneous electric fish, functional characteristics, 775, 784, 810
Afferent neurons, mechanoreceptive cutaneous
  electric fish, functional characteristics, 775
  forelimb of the raccoon, characteristics, 312
  stimulus-response relationship, 312, 359
  Weber functions, 359
Afferent neurons, gustatory
  fiber branching and distribution, fungiform papilla, 154
Afferent neurons, muscle
  group I fiber depolarization and monosynaptic reflex depression, 290
  group II fibers, excitation of ipsilateral extensor motoneurons, 545
  succinylcholine depolarization, 290
Afferent neurons, muscle spindle
  sensitivity in cerebellar ablation and recovery, 943
Afferent neurons, somatic sensory
  depolarization, and trigeminal presynaptic inhibition, 695
  medial lemniscal system, organization in the raccoon, 312
  stimulus-response relationships, 312, 359
Afferent neurons, tactile cutaneous
  monkey hind paw, functional characteristics, 966
  semilunar ganglion, unit activity and organization, 682
  trigeminal brain-stem nuclei, presynaptic inhibition, 695
  trigeminal spinal tract, organization, 682, 695
Afferent neurons, vestibular
  activation of tonic and kinetic vestibular neurons, synaptic organization, 1014
Ajmone Marsan, C., 342
Albe-Fessard, D., 100
Alkali earth cations
  membrane permeability and potentials, spinal ganglia, 457
Alpha motoneurons
  excitability in cerebellar ablation and recovery, 943
Anesthesia
  central regulation of muscle spindle sensory endings, 724
Arousal
  diffuse cortical activation waves in, 893
  sensory transmission in geniculate striate system during, 443
Association cortex
  nonspecific sensory potentials, inhibition by basal ganglia, 100
Auditory cortex: *see also* Auditory neurons and specific areas
  response to stimuli after inferior colliculus section, 1185
  tone duration discrimination, functional areas, 673
  tone duration, frequency and pattern discrimination, ablation effects, 673
Auditory neurons
  cochlear nucleus excitatory and inhibitory response areas, 863
  response to frequency modulated sound stimuli, 655
  steady-state properties and response to complex sound, 655
Auditory pathway
  additive and multiplicative responses, collicular neurons, 641
  cochlear nucleus unit activity, alterations after sound exposure, 850
  cochlear nucleus unit excitatory and inhibitory response areas, 863
  inferior colliculus brachium section and cortical response to stimuli, 1185
  transmission time, frequency modulated sound, 655
Auditory stimuli
  aftereffects, suppression of cochlear nucleus unit activity, 850
  cochlear nucleus excitatory and inhibitory response areas, 863
Augmenting response, cortical
  membrane and synaptic potentials in motor cortex neurons, 166

Axons
gastrocnemius, conduction time, 71
lobster, ion flux and concentration, 742
motoneuron, diameter and cell size relationship, 71, 85, 560, 581, 599, 958
olfactory tract, conduction velocity and diameter, 139
pre- and postsynaptic, in the gracilis nucleus, 48
pyramidal tract, conduction velocity and functional properties, 216, 908
pyramidal tract, functional properties of large and small, 216, 908
slow exciter and inhibitor, insect skeletal muscle innervation, 497
soleus, conduction time, 71
squid, ion flux and transfer numbers, 526

BACH-Y-RITA, P., 1223
Barium ions
spinal ganglia membrane permeability and potentials, 457
Basal ganglia
central neural function of, 100
inhibition of nonspecific sensory activity, 100
spinal motoneuron recruitment, neuron size and, 958
BAUMGARTNER, G. L., J. L. BROWN, AND A. SCHULZ. Responses of single units of the cat visual system to rectangular stimulus patterns, 1
Behavior
conditioned reflex response to cortical and subcortical stimulation, 623
spontaneous cortical activation waves and EEG arousal pattern, relationships, 893
Betz cells
inhibitory postsynaptic potentials, strychninization and, 342
Biceps semitendinosus nerve: *see also* Peripheral muscle nerves
group II fiber activity, 545
ipsilateral excitation of gastrocnemius soleus motoneuron, 545
BISHOP, G. H., 1206
BISHOP, P. O., 19
Blindness
ocular deprivation, 1029, 1060
BLOMQUIST, A. J. AND C. A. LORENZINI. Projection of dorsal roots and sensory nerves to cortical sensory motor regions of squirrel monkey, 1195
Brain stem
spinal motoneuron recruitment, neuron size and, 958
BRINLEY, F. J., JR. Sodium, potassium, and chloride concentrations and fluxes in the isolated giant axon of *Homarus*, 742

CASEY, K. L., 1101
CASEY, K. L., M. CUÉNOD, AND P. D. MACLEAN. Unit analysis of visual input to posterior limbic cortex. II. Intracerebral stimuli, 1118
Caudate nucleus
inhibition of nonspecific sensory activity, 100
Cell size, motoneurons
functional properties, relationship, 71, 85, 216, 560, 581, 599, 959
Central nervous system: *see also* specific areas and structures
basal ganglia, function in, 100
gracilis nucleus functional organization, corticofugal effects, 48
leech, sodium and potassium content, 519
medullary electroreceptive mechanisms in fish, 800
muscle spindle sensory endings, discharge rate regulation, 724
postexcitatory cochlear nucleus depression, mechanism of, 850
tactile discrimination, Weber functions and, 359
Cerebellothalamocortical projection system
nonspecific internuclear inhibition, 487
Cerebellum
spinal motoneuron recruitment, neuron size and, 958

Cerebellum, function
cerebellar ablation and recovery process, 943
flexor and extensor muscle spindle sensitivity, 943
gamma bias and alpha motoneuron activity, 943
proprioception, 943
Cerebral cortex: *see also* specific areas and structures
activation waves during desynchronized EEG pattern, 893
conditioned reflex response to stimulation of, 623
somatotopically organized sensorimotor areas, primates, 1195
supplementary sensory area organization, primates, 1195
Cerebral cortex, insular temporal
tone duration discrimination, 673
Cerebral cortex, SII area
tone duration discrimination, 673
Cerebral hemispheres
interhemispheric responses in the opossum, 189
CHIARANDINI, D. J., 710
Chloride flux
lobster giant axon, 742
Chloride ions
inhibitory electrogenesis, insect skeletal muscle, 497
lobster axon concentration, 742
noncholinergic inhibition in snail neurons, 710
transference number, squid giant axon, 526
Cingulate gyrus, posterior
limbic cortex unit response to visual stimulation, 1101, 1118
CLARE, M. H., 1206
Coatimundi
somatic sensory representation in dorsal root fibers, 321
Cochlear nucleus
auditory neuron excitatory and inhibitory response areas, 863
unit spontaneous activity, alterations after sound exposure, 850
Collicular neurons
additive and multiplicative reactions, 641
Commissure, anterior
interhemispheric responses in the opossum, 189
Commissure, hippocampal
interhemispheric responses in the opossum, 189
Conditioned reflex
efferent unit response changes to repeated stimulation, 200
Conduction velocity
discharge frequency relationship in pyramidal tract neurons, 216
gastrocnemius axon, 85
olfactory tract axons, 139
pyramidal tract axons, and membrane properties, 908
soleus axon, 71
trigeminal cutaneous afferents, axon segments, 682
Contraction time
motor unit, gastrocnemius muscle, 85
motor unit, soleus muscle, 71
Convergence
bisensory and trisensory, visual cortex units, 1223
COOK, W. A., JR., D. R. NEILSON, JR., AND J. M. BROOKHART. Primary afferent depolarization and monosynaptic reflex depression following succinylcholine administration, 290
Corpus callosum
and anterior commissure in the opossum, functional counterpart, 189
Cortical evoked potentials
artificial squint and striate cortex response to eye stimulation, 1041
auditory cortex response to stimuli, inferior colliculus brachium section, 1185
auditory neurons, frequency modulated sound stimuli, 655
dorsal root fibers C_3–S_2 stimulation, response in primates, 1195
geniculate units, moving stimuli, 19
immature neocortex, thalamocortical projection stimulation, 925
inhibition and facilitation of spinal motoneurons, 398
inhibitory postsynaptic, strychninization and, 342
interhemispheric responses, 189
membrane and synaptic potentials in motor cortex neurons, effect on, 166, 342
motor cortex stimulation, excitation site, 1206
nonspecific sensory, inhibition by basal ganglia, 100
optic pathways stimulation during sleep and arousal, 443
pyramidal tract neuron stimulation, 1206
radial nerve stimulation, response in primates, 1195
striate cortex response to eye stimulation in ocular deprivation, 1029, 1060
trigeminal nerves stimulation, response in primates, 1195
visual area I, 1, 229
visual areas II and III, 229

visual cortex units, bisensory and trisensory convergence, 1223
visual system, contrast stimuli, 1
Cortical neurons
nonpyramidal and pyramidal, responses to cortical polarization, 166
Corticofugal stimulation
gracilis nucleus, 48
CRAMER, H., 1223
CUÉNOD, M., 1118
CUÉNOD, M., K. L. CASEY, AND P. D. MACLEAN. Unit analysis of visual input to posterior limbic cortex. I. Photic stimulation, 1101
Cutaneous receptive fields: *see* Receptive fields
Cutaneous stimuli
visual cortex neuron response, 1223

Contents of Volume XXVIII

NO. 1. JANUARY 1965

Responses of single units of the cat visual system to rectangular stimulus patterns. G. BAUMGARTNER, J. L. BROWN, AND A. SCHULZ 1
Responses of single units in lateral geniculate nucleus of cat to moving visual patterns. W. KOZAK, R. W. RODIECK, AND P. O. BISHOP 19
N. gracilis of cat. Functional organization and corticofugal effects. DAVID L. WINTER 48
Properties of motor units in a homogeneous red muscle (soleus) of the cat. ALEXANDER M. MCPHEDRAN, RAYMOND B. WUERKER, AND ELWOOD HENNEMAN .. 71
Properties of motor units in a heterogeneous pale muscle (m. gastrocnemius) of the cat. RAYMOUND B. WUERKER, ALEXANDER M. MCPHEDRAN, AND ELWOOD HENNEMAN 85
Inhibition of nonspecific sensory activities following striopallidal and capsular stimulation. G. KRAUTHAMER AND DENISE ALBE-FESSARD 100
Monosynaptic reflex and natural sleep in the cat. KISOU KUBOTA, YOSHIAKI IWAMURA, AND YOSIZUMI NIIMI 125
Electrophysiological and histological properties of the olfactory tract of the burbot (*Lota lota* L.). KJELL B. DÖVING AND GÖSTA GEMNE 139
Innervation of the fungiform papillae in the frog tongue. G. RAPUZZI AND C. CASELLA 154
Intracellular activities and evoked potential changes during polarization of motor cortex. DOMINICK P. PURPURA AND JAMES G. MCMURTRY 166
Announcement 186

NO. 2. MARCH 1965

Interhemispheric responses in the opossum. LOUIS R. NELSON AND RICHARD A. LENDE 189
Progressive changes in efferent unit responses to repeated cutaneous stimulation in spinal cats. JENNIFER S. BUCHWALD, EDWARD S. HALAS, AND SHARON SCHRAMM 200
Relation of discharge frequency to conduction velocity in pyramidal tract neurons. EDWARD V. EVARTS 216
Receptive fields and functional architecture in two nonstriate visual areas (18 and 19) of the cat. DAVID H. HUBEL AND TORSTEN N. WIESEL 229
Primary afferent depolarization and monosynaptic reflex depression following succinylcholine administration. WESLEY A. COOK, JR., DUNCAN R. NEILSON, JR., AND JOHN M. BROOKHART 290
Somatic sensory representation of forelimb in dorsal root fibers of raccoon, coatimundi, and cat. BENJAMIN H. PUBOLS, JR., W. I. WELKER, AND J. I. JOHNSON, JR. 312
Cortical inhibitory postsynaptic potentials and strychninization. D. A. POLLEN AND C. AJMONE MARSAN 342
Neural activity in mechanoreceptive cutaneous afferents: stimulus-response relations, Weber functions, and information transmission. GERHARD WERNER AND VERNON B. MOUNTCASTLE 359
Comparison of motor cortex influences upon various hind-limb motoneurons in pyramidal cats and primates. KENICHI UEMURA AND JAMES B. PRESTON 398
Mechanisms of supraspinal actions upon spinal cord activities. Reticular inhibitory mechanisms upon flexor motoneurons. R. LLINAS AND C. A. TERZUOLO 413
Obituary 423
Announcement 424

NO. 3. MAY 1965

Neuromuscular depression and the apparent depletion of transmitter in mammalian muscle. ROGER E. THIES ... 427

Sensory transmission in the geniculostriate system of the cat during natural sleep and arousal. NICOLA DAGNINO, EMILIO FAVALE, CARLO LOEB, AND MARIO MANFREDI ... 443

Effect of alkali-earth cations on frog spinal ganglion cell. S. NISHI, H. SOEDA, AND K. KOKETSU ... 457

Somatosensory loss in monkeys after ipsilateral cortical ablation. JOSEPHINE SEMMES AND MORTIMER MISHKIN ... 473

Intracellular study of internuclear inhibition in ventrolateral thalamic neurons. DOMINICK P. PURPURA, TIMOTHY SCARFF, AND JAMES G. MCMURTRY ... 487

Peripheral inhibition in skeletal muscle of insects. PETER N. R. USHERWOOD AND HARRY GRUNDFEST ... 497

Na and K content of glial cells and neurons determined by flame photometry in the central nervous system of the leech. JOHN G. NICHOLLS AND STEPHEN W. KUFFLER ... 519

Ion fluxes and transference numbers in squid axons. F. J. BRINDLEY, JR. AND L. J. MULLINS ... 526

Excitation of extensor motoneurons by group II afferent fibers in ipsilateral muscle nerves. VICTOR J. WILSON AND MASAMICHI KATO ... 545

Evidence that McIlwain's periphery effect is not a stray light artifact. W. R. LEVICK, C. W. OYSTER, AND D. L. DAVIS ... 555

Functional significance of cell size in spinal motoneurons. ELWOOD HENNEMAN, GEORGE SOMJEN, AND DAVID O. CARPENTER ... 560

Relations between structure and function in the design of skeletal muscles. ELWOOD HENNEMAN AND CAMILLE B. OLSON ... 581

Excitability and inhibitibility of motoneurons of different sizes. ELWOOD HENNEMAN, GEORGE SOMJEN, AND DAVID O. CARPENTER ... 599

NO. 4. JULY 1965

Conditioned reflexes elicited by electrical stimulation of the brain in macaques. ROBERT W. DOTY ... 623

Relationship between spontaneous and evoked unit activity in the inferior colliculus of rats. JAN BUREŠ AND OLGA BUREŠOVÁ ... 641

Responses of auditory cortical neurons to stimuli of changing frequency. I. C. WHITFIELD AND E. F. EVANS ... 655

Discrimination of tone duration after bilateral ablation of cortical auditory areas. DONALD P. SCHARLOCK, WILLIAM D. NEFF, AND NORMAN L. STROMINGER ... 673

Functional organization of tactile cutaneous afferents within the semilunar ganglion and trigeminal spinal tract of the cat. I. DARIAN-SMITH, PATRICIA MUTTON, AND ROBYN PROCTOR ... 682

Presynaptic component in the afferent inhibition observed within trigeminal brainstem nuclei of the cat. I. DARIAN-SMITH ... 695

Ionic mechanism associated with noncholinergic synaptic inhibition in molluscan neurons. H. M. GERSCHENFELD AND D. J. CHIARANDINI ... 710

Centrifugal modifications of discharge rates of primary and secondary endings of muscle spindles in the hind limb of the cat. TOSHINORI HONGO AND HIROSHI SHIMAZU ... 724

Sodium, potassium, and chloride concentrations and fluxes in the isolated giant axon of *Homarus*. F. J. BRINDLEY, JR. ... 742

NO. 5 SEPTEMBER 1965

Physiological properties of electroreceptors in the electric eel, *Electrophorus electricus*. S. HAGIWARA, T. SZABO, AND P. S. ENGER 775
Electroreceptor mechanisms in a high-frequency weakly electric fish, *Sternarchus albifrons*. S. HAGIWARA, T. SZABO, AND P. S. ENGER 784
Activity of central neurons involved in electroreception in some weakly electric fish (Gymnotidae). P. S. ENGER AND T. SZABO 800
Response of cat retinal ganglion cells to moving visual patterns. R. W. RODIECK AND J. STONE 819
Analysis of receptive fields of cat retinal ganglion cells. R. W. RODIECK AND J. STONE 833
Suppression of single unit activity in cochlear nucleus of the cat following sound stimulation. ARNOLD STARR 850
Excitatory and inhibitory response areas of auditory neurons in the cochlear nucleus. DONALD D. GREENWOOD AND NAOSHIGE MARUYAMA 863
Diffuse cortical activation waves during so-called desynchronized EEG patterns. J. CALVET, M. C. CALVET, AND J. M. LANGLOIS 893
Slow and fast groups of pyramidal tract cells and their respective membrane properties. KUNITARO TAKAHASHI 908
Properties of synaptic activities and spike potentials of neurons in immature neocortex. DOMINICK P. PURPURA, ROBERT J. SHOFER, AND TIMOTHY SCARFF 925
Recovery of muscle spindle activity in cats after cerebellar ablation. JOSEPH P. VAN DER MEULEN AND SID GILMAN 943
Responses of motoneurons of different sizes to graded stimulation of supraspinal centers of the brain. GEORGE SOMJEN, DAVID O. CARPENTER, AND ELWOOD HENNEMAN 958
Properties of touch receptors in distal glabrous skin of the monkey. U. LINDBLOM 966
Obituary 986

NO. 6. NOVEMBER 1965

Tonic and kinetic responses of cat's vestibular neurons to horizontal angular acceleration. HIROSHI SHIMAZU AND WOLFGANG PRECHT 991
Functional connections of tonic and kinetic vestibular neurons with primary vestibular afferents. WOLFGANG PRECHT AND HIROSHI SHIMAZU 1014
Comparison of the effects of unilateral and bilateral eye closure on cortical unit responses in kittens. TORSTEN N. WIESEL AND DAVID H. HUBEL 1029
Binocular interaction in striate cortex of kittens reared with artificial squint. DAVID H. HUBEL AND TORSTEN N. WIESEL 1041
Extent of recovery from the effects of visual deprivation in kittens. TORSTEN N. WIESEL AND DAVID H. HUBEL 1060
Rat retinal ganglion cells: receptive field organization and maintained activity. JOEL E. BROWN AND J. ARISTIDES ROJAS 1073
Dendritic fields of retinal ganglion cells of the rat. JOEL E. BROWN 1091
Unit analysis of visual input to posterior limbic cortex. I. Photic stimulation. MICHEL CUÉNOD, KENNETH L. CASEY, AND PAUL D. MACLEAN 1101
Unit analysis of visual input to posterior limbic cortex. II. Intracerebral stimuli. KENNETH L. CASEY, MICHEL CUÉNOD, AND PAUL D. MACLEAN 1118
Mesencephalic auditory region of the bullfrog. H. DAVID POTTER 1132
Patterns of acoustically evoked discharges of neurons in the mesencephalon of the bullfrog. H. DAVID POTTER 1155

Evoked potentials in auditory cortex after bilateral transection of the brachium of the inferior colliculus in the cat. PHILIP C. NIEDER AND NORMAN L. STROMINGER 1185
Projection of dorsal roots and sensory nerves to cortical sensory motor regions of squirrel monkey. A. J. BLOMQUIST AND C. AMBROGI LORENZINI 1195
Site of excitation in stimulation of the motor cortex. W. M. LANDAU, G. H. BISHOP, AND M. H. CLARE 1206
Neuronal convergence of noxious, acoustic, and visual stimuli in the visual cortex of the cat. K. MURATA, H. CRAMER, AND P. BACH-Y-RITA 1223
